Github: <https://github.com/khanisherigidindla> Portfolio: [KHANISH-Full Stack Developer](#)

SUMMARY

Detail-oriented Full Stack Developer with experience in application development, system integration, and performance optimization. Skilled in backend development, frontend integration, RESTful services, database management, authentication, and application security. Strong understanding of software development life cycle, Agile methodology, testing, debugging, and deployment processes. Focused on delivering scalable, secure, and production-ready solutions aligned with business requirements.

INTERNSHIP EXPERIENCE

Koundinyasa Technology — Software Intern (Feb 2026 – April 2026)

- Designed and developed scalable REST APIs using Node.js, Express, and MongoDB, implementing validation, middleware, and secure request handling for robust backend architecture.
- Built secure authentication and authorization systems using JWT and RBAC, including login/signup flows, password hashing (bcrypt), and token lifecycle.
- Engineered transaction and wallet systems with payment gateway integration, implementing idempotency, failure recovery, and optimized database design.

PROJECTS

Unified Smart Service Hub | Java, Spring Boot, Flask, React, JWT, Microservices, MySQL |

Situation: Traditional service platforms lacked seamless integration between backend systems and processing services.

Task : Build a scalable, secure and high-performance platform capable of handling real-time service requests with automation.

Action:

- Engineered a hybrid microservices system connecting Spring Boot backend with AI services in Flask, boosting processing speed by 45%.
- Built a React dashboard for real-time issue reporting & automated service routing, increasing user engagement by 50%.

Result: Improved processing efficiency by 45%, increased user engagement by 50%, and enhanced application reliability and security.

Real AI-Powered Interview Bot | NLP-Based Assessment | Python, Flask, SpaCy, NLTK, JavaScript, MySQL, REST APIs |

- Situation:** Manual interview evaluation methods were time-consuming and inconsistent.
- Task:** Design an automated assessment system with higher accuracy and scalability.
- Action:** Designed and developed an intelligent assessment engine to analyze candidate responses.
- Result:** Increased analysis accuracy by 35%, reduced response time by 20%, and improved overall user interaction by 40%.

SKILLS

Languages : Java, Python, JavaScript, SQL, HTML, CSS,
Frameworks : ReactJS, Node.js, Express.js, Django, Flask, Spring Boot
Databases : MySQL,PostgreSQL,MongoDB
Models : Numpy, Pandas, Matplotlib, Scipy, Scikit-Learn, Tensorflow, Pytorch, Seaborn
Tools : Git, GitHub, VS Code, Postman,
Concepts : SDLC, Agile, OOPs, REST APIs , Data Structures and algorithms
Soft Skills : Communication, Logical Reasoning, Problem Solving, Teamwork

EDUCATION

Bachelor of Technology in Computer Science Engineering
Sree Venkateswara College | 2021 – 2025 | **8.1 CGPA**
Intermediate (MPC)
Narayana Junior College | 2019 – 2021 | **89%**
Secondary School
Krishnaveni Talent School | 2018 – 2019 | **9.5 CGPA**

CERTIFICATIONS

Software Trainee
Python Full Stack Development
Devops with Aws
Mern Stack Development
Deep Learning
Ai Tools & Workshop
